DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on August 24, 2005 has been entered.

Information Disclosure Statement

Applicant's submission of the information disclosure statement filed on August 24, 2005 has been considered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20, 21, 26, 27, 29, 30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 8 of U.S. Patent No. 6,661,814. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are broader than the claims of cited patent.

Allowable Subject Matter

Claims 1-7,10-16,18,20-22,24 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the cited prior arts alone or in combination discloses the claimed laser with the recited limitations of independent claims 1,16,22,28,29 and 30.

Regarding claims 1-7,

None of the cited prior arts discloses or suggest the claimed laser with the recited limitations in particular having at least one of the frequency or the amplitude of the tuning circuit selected to increase the coupling efficiency of the optical beam by spreading a line width of the optical beam.

Regarding claims 16,18,22 and 23,

None of the cited prior arts discloses or suggest the claimed laser with the recited limitations in particular having filtering the optical beam to exhibit a first set of passband aligned with corresponding channels and tuning the optical beam to at least a selected one of the first set of passbands.

Regarding claims 10-15 and 28,

None of the cited prior arts discloses or suggest the claimed laser with the recited limitations in particular having a grid generator to generate a first set of passband aligned with the center wavelength and a channel selector to select the channels to tune the optical beam by generation and tuning of at least a second passband with the first set of passband.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
